Google Cloud Platform o	ducation grants credits terms	and conditions
, , ,	l continue" below, you, on be sent ("You") agree to these to	
The credit is valid for G	oogle Cloud Platform produ	cts and is subject to Your

The credit is valid for Google Cloud Platform products and is subject to Your acceptance of the applicable Google Cloud Platform License Agreement and any other applicable terms of service. The credit is non-transferable and may not be sold or bartered. Unused credit expires on the date indicated on the media conveying the promotion code. The credit may be issued in increments as You use the credit over the period of time during which the credit is valid. Offer void where prohibited by law.

You represent that you are accepting the promotional credit on behalf of your educational institution and the credit can only be used on behalf of the educational entity and not for your personal use. You represent, on behalf of such educational entity, that (i) You are authorized to accept this credit; (ii) the credit is consistent with all applicable laws and regulations, including relevant ethics rules and laws; and (iii) the provision of credits will not negatively impact Google's current or future ability to do business with such educational entity.

You agree that we may share the following information with your educational institution and course instructor: (1) personal information that you provide to us during the coupon redemption process and (2) information regarding your use of the coupon and Google Cloud Platform products.

Accept and continue Clear

The webpage should refresh and say "Creating project. This may take a few moments."

When the page is finished loading, many options for the Google Cloud Platform should open.

In the left-hand sidebar, you should choose "APIs & Services" and then "Credentials" from the small menu that opens. A new page will open, for APIs Credentials, and you press the button to "Create credentials" and then choose "API key" from the dropdown menu that appears.

u: A	ou need credentials to access APIs. Enable the APIs you plan to se and then create the credentials they require. Depending on the PI, you need an API key, a service account, or an OAuth 2.0 client D. For more information, see the authentication documentation.
	Create credentials 🔻
	API key Identifies your project using a simple API key to check quota and acce
	OAuth client ID Requests user consent so your app can access the user's data
	Service account key Enables server-to-server, app-level authentication using robot account

A new window should open that says "API key created".

It is safe to click the "close" button. There is a little double-window picture frame shape that is immediately to the right of the long API key. This allows us to copy and paste the key somewhere that you will remember it, for later use. (*Please do not type this API key by hand. It is good to copy-and-paste, and to doing things in a reproducible, accurate way.*)

Now we want to click on the "Library" option under in the left-hand APIs & Services sidebar. This should open the API Library.
